TITLE : ENGINE GENERATING FACILITY

ABSTRACT : PURPOSE: To reduce the cost of a power facilities for a communication device for telephone lines and a local computer connected to the controller of engine generating facilities provided in a cogeneration device, an emergency generating device, etc.

CONSTITUTION: The charging output terminals 3a of an AC generator 3 provided in engine generating facilities 1 and input terminals 16 for a commercial power source are selectively connected to a battery 9 through the medium of a switching device A, and preparatory power terminals 27 are taken out from the secondary circuit 26 of the switching device A. And the controller 8 of the engine generating facilities 1 is connected to a local computer 30 through a communication line 29, and a communication device 31 for telephone lines is connected to the computer 30. A power circuit 36 for the computer 30 and the above-mentioned communication device 31 for telephone lines is connected to the above-mentioned preparatory power terminals 27.
